

# COVID-19 Prevention Program (CPP) for Mount Shasta Union School District

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

**Date:** December 17, 2020

## Authority and Responsibility

The Superintendent has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

## Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections form** as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

## Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards.

In the interest of protecting community and workplace health, any employee may report, in writing, any unsafe condition in the working environment to the immediate supervisor. The supervisor shall, within two (2) working days, respond in writing to the employee, and the union, stating what has been done to make the condition safe or, if no action will be taken, the reason(s) why. This method of resolving safety concerns shall not displace the right to file OSHA or other administrative complaints or to bring a grievance for violation of this agreement.

All employees shall have the right, without retaliation, to refuse to perform work reasonably considered to be unsafe, by notifying their supervisor in writing of such refusal and the basis therefore. Employees may be directed to complete alternate work or work under modified conditions as directed until conditions are made safe for the completion of the original assignment, provided modification sufficiently addresses safety concern(s).

## Employee screening

The district follows the [CDPH Guidelines](#) which states school districts and schools shall test staff periodically, as testing capacity permits and as practicable. All staff working on campus are tested for COVID-19 over 2 months, where 25% of staff are tested every 2 weeks. Currently, all tests are conducted through a drive-through model administered by the Shasta Cascade Health Center in Mount

Shasta, but this is subject to change.

All employees shall self-screen following the [CDC Symptom Checklist](#) daily for symptoms associated with COVID-19 infection prior to entering school. Non-contact thermometers are available at each school site.

## **Correction of COVID-19 Hazards**

Unsafe or unhealthy work conditions, practices, or procedures will be documented on the **Appendix B: COVID-19 Inspections** form and corrected in a timely manner based on the severity of the hazards, as follows:

The severity of the hazard will be assessed and correction time frames assigned, accordingly.

Individuals will be identified as being responsible for timely correction.

Follow-up measures will be taken to ensure timely correction.

## **Control of COVID-19 Hazards**

### **Physical Distancing**

Where possible, we ensure at least six feet of physical distancing at all times in our workplace by:

- Implementing flexible work hours by rotating or staggering shifts to limit the number of employees on site at the same time.
- Increasing physical space between employees by modifying the workspace.
- Avoiding shared workspaces (desks, offices, and cubicles) and work items (phones, computers, other work tools, and equipment) when possible. If they must be shared, following the [Cleaning and Disinfecting the Building and Facility Guidelines](#) to clean and disinfect shared workspaces and work items before and after use.
- Increasing physical space between employees and public by offering drive-through service or physical barriers such as partitions.
- Using signs, tape marks, or other visual cues on the floor, placed 6 feet apart, to indicate where to stand when physical barriers are not possible.
- Close or limit access to common areas where employees are likely to congregate and interact.
- Delivering services and holding meetings remotely by phone, video, or Internet.
- Limiting any unnecessary travel with passenger(s) from one site to another in work vehicles and personal employee vehicles.
- Eliminating all non-essential and non-related services, such as entertainment activities.
- Using videoconferencing or teleconferencing when possible for work-related meetings and gatherings.
- Canceling, adjusting, or postponing large work-related meetings or gatherings that can only occur in-person in accordance with state and local regulations and guidance.
- When videoconferencing or teleconferencing is not possible, holding meetings in open, well-ventilated spaces continuing to maintain a distance of 6 feet apart and wear cloth face coverings.

Employees will also be asked to practice social distancing outdoors including, but not limited to the following:

- When working in sports fields, playgrounds, assembly areas, and/or other outdoor areas.
- Before starting the work shift.

- After the work shift.
  - Coming and going from vehicles.
  - Entering, working, and exiting physical buildings or other structures.
- During breaks and lunch periods.

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.

## **Face Coverings**

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department.

The following are exceptions to the use of face coverings in our workplace:

- When a teacher is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.

Face coverings are required to be worn properly at all times by all individuals on a school campus indoors or outdoors. This applies to all staff, all students in grades K-8, all administrators, and any visitors on campus. Individuals who are not in compliance with the face covering requirements shall be sent home. If a teacher is working alone in their classroom they may remove their mask or face shield as long as they immediately clean and sanitize the area before leaving the classroom.

Face coverings shall not be required for students or staff if there is a medical or behavioral contraindication. The need for a specific student shall be communicated with all staff.

For unit members and students who cannot wear a mask, face shields with neck drapes tucked into the shirt may be used. Masks and face shields may not be required for students with medical apparatus which prevents or obstructs the use of the apparatus.

If available, N95 respirators shall be fit-tested and provided to:

Unit members caring for individuals who get sick at the worksite with possible symptoms of COVID-19 illness; and

Unit members with a high number of daily workplace contacts or to unit members who request in writing N95 respirators due to professional or personal health concerns. Unit members shall not be required to submit a note from a medical professional when making this request.

## **Engineering controls**

We implement the following measures for situations where we cannot maintain at least six feet between individuals:

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems.

Public health officials indicate that proper ventilation is necessary to minimize the transmission and infection from COVID-19 especially for individuals in a closed space for extended periods of time by reducing the airborne concentration of the virus and thus the risk of transmission and infection of COVID-19 through the air. All locations with functioning windows shall be encouraged to keep them open

depending on weather, temperature, or air quality conditions.

The District shall ensure all HVAC systems operate on the mode which delivers the most fresh air changes per hour, including disabling demand-controlled ventilation, and open outdoor air dampers to 100% as indoor and outdoor conditions safely permit.

HVAC air filters are currently equipped with a minimum of MERV 8 filters and changed at the recommended intervals.

The District has supplied classrooms with air purifiers.

## **Cleaning and disinfecting**

We implement the following cleaning and disinfection measures for frequently touched surfaces:

Mt. Shasta Union School District established routine schedules to clean and disinfect common surfaces and objects in the workplace. This includes, but is not limited to, classroom technology devices, containers, counters, tables, desks, chairs, benches, door handles, knobs, drinking fountains, refrigerators, vending machines, portable restroom and bathroom surfaces, automobiles and buses – inside and out, and trash cans.

The process of disinfecting includes providing disinfecting products that are EPA approved for use against the virus that causes COVID-19 and following the manufacturer's instructions for all cleaning and disinfection products (e.g., safety requirements, PPE, concentration, contact time).

Coronaviruses on surfaces and objects naturally die within hours to days. Warmer temperatures and exposure to sunlight will reduce the time the virus survives on surfaces and objects. Normal routine cleaning with soap and water removes germs and dirt from surfaces. It lowers the risk of spreading COVID-19 infection.

Disinfectants kill germs on surfaces after cleaning, that can further lower the risk of spreading infection. Employees will need to follow the District's approved disinfecting products and procedures when using disinfectants. Disinfecting procedures include:

- Some surfaces only need to be cleaned with soap and water. For example, surfaces and objects that are not frequently touched should be cleaned and do not require additional disinfection.
- Clean and disinfect frequently touched surfaces daily and shared workspaces and work items before and after use.
- Store and use disinfectants in a responsible and appropriate manner according to the label.
- Keep all disinfectants out of the reach of children. Disinfectants should typically not be applied on items used by children, especially any items that children might put in their mouths. Many disinfectants are toxic when swallowed.
- Do not overuse or stockpile disinfectants or other supplies.
- Always wear gloves appropriate for the chemicals being used when you are cleaning and disinfecting. Additional personal protective equipment (PPE) may be needed based on setting and product.
- Areas unoccupied for 7 or more days need only routine cleaning.
- Outdoor areas generally require normal routine cleaning and do not require disinfection.

## **Electronics**

For electronics, such as tablets, touch screens, keyboards, remote controls:

- Consider putting a wipeable cover on electronics.
- Follow manufacturer's instructions for cleaning and disinfecting.
- If no guidance, use alcohol-based wipes or sprays containing at least 70% alcohol. Dry surface thoroughly.

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

## **Cleaning and Disinfecting Building or Facility if Someone is Sick:**

- Close off areas used by the sick person.
- Open outside doors and windows to increase air circulation in the area.
  - Wait 24 hours before you clean or disinfect.
  - If 24 hours is not feasible, wait as long as possible.
- Clean and disinfect all areas used by the sick person, such as offices, bathrooms, common areas, shared electronic equipment like tablets, touch screens, keyboards, and remote controls.
- Always wash immediately after removing gloves and after contact with a sick person.
- If more than 7 days since the sick person visited or used the facility, additional cleaning and disinfection is not necessary.
- Continue routine cleaning and disinfection

## **Shared tools, equipment and personal protective equipment (PPE)**

PPE must not be shared, e.g., gloves, goggles, and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses by wiping down the equipment with a sanitizing solution.

Sharing of vehicles will be minimized to the extent feasible, and high-touch points (for example, steering wheel, door handles, seatbelt buckles, armrests, shifter, etc.) will be disinfected between users.

## **Hand sanitizing**

The following is in place in order to implement effective hand sanitizing procedures:

The district is renting 6 additional hand washing stations which are cleaned, stocked and maintained on a regular basis.

To prevent the spread of respiratory infections from one person to the next, frequent hand washing is recommended.

Hand hygiene procedures include the use of alcohol-based hand rubs and hand washing with soap and water. Washing hands with soap and water is one of the most effective ways to prevent the spread of germs. If soap and water are not readily available, use an alcohol-based hand sanitizer (containing at least 60% ethanol alcohol).

Properly hand wash with soap and water by:

- Wet hands first with water.
- Apply soap to hands.
- Rub hands vigorously for at least 20 seconds, covering all surfaces of hands and fingers.
- Rinse hands with water and dry thoroughly with paper towel.
- Use paper towel to turn off water faucet.

Alcohol-based hand rub is an ideal method for decontaminating hands, except when hands are visibly soiled (e.g., dirt, blood, body fluids), and may not remove harmful chemicals from hands like pesticides and heavy metals, in which case soap and water should be used. Hand hygiene stations should be strategically placed to ensure easy access.

Using Alcohol-based Hand Rub (follow manufacturer's directions):

- Dispense the recommended volume of product.
- Apply product to the palm of one hand, and
- Rub hands together, covering all surfaces of hands and fingers until they are dry (no rinsing is

required). This should take around 20 seconds.

Hand washing facilities will be maintained to provide adequate supply of hand washing soap and paper towels.

### **Personal protective equipment (PPE) used to control employees' exposure to COVID-19**

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained.

We provide and ensure use of eye protection and respiratory protection in accordance with section 5144 when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids.

### **Investigating and Responding to COVID-19 Cases**

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be offered COVID-19 testing at no cost during their working hours.

#### **Siskiyou County Testing Facilities:**

##### **Fairchild Medical Center**

444 Bruce St, Yreka, CA 96097

(530) 842-0606

## **System for Communicating**

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Employees should report COVID-19 symptoms and possible hazards to their principal.
- Employees can report symptoms and hazards without fear of reprisal.
- We have procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test.
- We provide Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

## **Training and Instruction**

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
  - COVID-19 is an infectious disease that can be spread through the air.
  - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
  - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Training will be administered through Keenan SafeSchools modules. Employees are notified of

mandatory training requirements and their due dates.

**Appendix D: COVID-19 Training Roster** may be used to document this training.

## Exclusion of COVID-19 Cases

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is work related. This will be accomplished by applying employer-provided employee sick leave benefits, payments from public sources or other means of maintaining earnings, and rights and benefits where permitted by law and when not covered by workers' compensation.
- Providing employees at the time of exclusion with information on available benefits.

## Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

## Return-to-Work Criteria

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
  - At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
  - COVID-19 symptoms have improved.
  - At least 10 days have passed since COVID-19 symptoms first appeared.
- COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work.
- If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.

---

Barry Barnhart, Superintendent

## Appendix B: COVID-19 Inspections

Date: **[enter date]**

Name of person conducting the inspection: **[enter names]**

Work location evaluated: **[enter information]**

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
<b>Engineering</b>			
Barriers/partitions			
Ventilation (amount of fresh air and filtration maximized)			
Additional room air filtration			
<b>Administrative</b>			
Physical distancing			
Surface cleaning and disinfection (frequently enough and adequate supplies)			
Hand washing facilities (adequate numbers and supplies)			
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions			
<b>PPE (not shared, available and being worn)</b>			
Face coverings (cleaned sufficiently often)			
Gloves			
Face shields/goggles			
Respiratory protection			

## Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

**Date:** [enter date]

**Name of person conducting the investigation:** [enter name(s)]

<b>Employee (or non-employee*) name:</b>		<b>Occupation (if non-employee, why they were in the workplace):</b>	
<b>Location where employee worked (or non-employee was present in the workplace):</b>		<b>Date investigation was initiated:</b>	
<b>Was COVID-19 test offered?</b>		<b>Name(s) of staff involved in the investigation:</b>	
<b>Date and time the COVID-19 case was last present in the workplace:</b>		<b>Date of the positive or negative test and/or diagnosis:</b>	
<b>Date the case first had one or more COVID-19 symptoms:</b>		<b>Information received regarding COVID-19 test results and onset of symptoms (attach documentation):</b>	

**Results of the evaluation of the COVID-19 case and all locations at the workplace that may have been visited by the COVID-19 case during the high-risk exposure period, and who may have been exposed (attach additional information):**

<b>Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:</b>			
<b>All employees who may have had COVID-19 exposure and their authorized representatives.</b>	<b>Date:</b>		
	<b>Names of employees that were notified:</b>		
<b>Independent contractors and other employers present at the workplace during the high-risk exposure period.</b>	<b>Date:</b>		
	<b>Names of individuals that were notified:</b>		
<b>What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?</b>		<b>What could be done to reduce exposure to COVID-19?</b>	
<b>Was local health department notified?</b>		<b>Date:</b>	

\*Should an employer be made aware of a non-employee infection source COVID-19 status.

## **Additional Consideration #1**

### **Multiple COVID-19 Infections and COVID-19 Outbreaks**

**This section of CPP will be in effect from the time we have three or more workplace exposures in a rolling 10-day period and until there are no new COVID-19 cases detected in our workplace for a 10-day period.**

#### **COVID-19 testing**

- We will provide COVID-19 testing to all employees in our exposed workplace except for employees who were not present during the period of an outbreak identified by a local health department or the relevant 10-day period. COVID-19 testing will be provided at no cost to employees during employees' working hours.
- COVID-19 testing consists of the following:
  - All employees in our exposed workplace will be immediately tested and then tested again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine period required by, or orders issued by, the local health department.
  - After the first two COVID-19 tests, we will continue to provide COVID-19 testing of employees who remain at the workplace at least once per week, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 10-day period.
  - We will provide additional testing when deemed necessary by Cal/OSHA.

#### **Exclusion of COVID-19 cases**

We will ensure COVID-19 cases and employees who had COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria** requirements, and local health officer orders if applicable.

#### **Investigation of workplace COVID-19 illness**

We will immediately investigate and determine possible workplace-related factors that contributed to the COVID-19 outbreak in accordance with our CPP **Investigating and Responding to COVID-19 Cases**.

#### **COVID-19 investigation, review and hazard correction**

In addition to our CPP **Identification and Evaluation of COVID-19 Hazards** and **Correction of COVID-19 Hazards**, we will immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review will be documented and include:

- Investigation of new or unabated COVID-19 hazards including:
  - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
  - Our COVID-19 testing policies.
  - Insufficient outdoor air.
  - Insufficient air filtration.
  - Lack of physical distancing.
- Updating the review:
  - Every thirty days that the outbreak continues.
  - In response to new information or to new or previously unrecognized COVID-19 hazards.
  - When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and review. We will consider:
  - Moving indoor tasks outdoors or having them performed remotely.

- Increasing outdoor air supply when work is done indoors.
- Improving air filtration.
- Increasing physical distancing as much as possible.
- Respiratory protection.
- [describe other applicable controls].

#### **Notifications to the local health department**

- Immediately, but no longer than 48 hours after learning of three or more COVID-19 cases in our workplace, we will contact the local health department for guidance on preventing the further spread of COVID-19 within the workplace.
- We will provide to the local health department the total number of COVID-19 cases and for each COVID-19 case, the name, contact information, occupation, workplace location, business address, the hospitalization and/or fatality status, and North American Industry Classification System code of the workplace of the COVID-19 case, and any other information requested by the local health department. We will continue to give notice to the local health department of any subsequent COVID-19 cases at our workplace.

## **Additional Consideration #2**

### **Major COVID-19 Outbreaks**

**This section will be added to our CPP should our workplace experience 20 or more COVID-19 cases within a 30-day period. Reference section 3205.2 for details.**

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 10-day period.

#### **COVID-19 testing**

We will provide twice a week COVID-19 testing, or more frequently if recommended by the local health department, to all employees present at our exposed workplace during the relevant 30-day period(s) and who remain at the workplace. COVID-19 testing will be provided at no cost to employees during employees' working hours.

#### **Exclusion of COVID-19 cases**

We will ensure COVID-19 cases and employees with COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria**, and any relevant local health department orders.

#### **Investigation of workplace COVID-19 illnesses**

We will comply with the requirements of our CPP **Investigating and Responding to COVID-19 Cases**.

#### **COVID-19 hazard correction**

In addition to the requirements of our CPP **Correction of COVID-19 Hazards**, we will take the following actions:

- In buildings or structures with mechanical ventilation, we will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters if compatible with the ventilation system. If MERV-13 or higher filters are not compatible with the ventilation system, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems would reduce the risk of transmission and implement their use to the degree feasible.
- We will determine the need for a respiratory protection program or changes to an existing respiratory protection program under CCR Title 8 section 5144 to address COVID-19 hazards.
- We will evaluate whether to halt some or all operations at our workplace until COVID-19 hazards have been corrected
- Implement any other control measures deemed necessary by Cal/OSHA.

#### **Notifications to the local health department**

We will comply with the requirements of our **Multiple COVID-19 Infections** and **COVID-19 Outbreaks-Notifications to the Local Health Department**.
