

COVID-19 Prevention Program (CPP) and Injury and Illness Prevention Program COVID-19 Addendum for Scott Valley Unified School District

With some exceptions, all employers and places of employment are required to establish and implement an effective written COVID-19 Prevention Program (CPP) pursuant to an Emergency Temporary Standard in place for COVID-19 (California Code of Regulations (CCR), Title 8, section 3205(c)). This COVID-19 Prevention Program (CPP) and Injury and Illness Prevention Program (IIPP) COVID-19 Addendum is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

Date: January 25, 2021

Authority and Responsibility

The Superintendent has overall authority and responsibility for implementing the provisions of this COVID-19 Prevention Program (CPP) and Injury and Illness Prevention Program (IIPP) COVID-19 Addendum in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Purpose

It is the policy of the Scott Valley Unified School District to ensure a safe and healthy environment for employees, staff, and students. Communicable and infectious diseases such as COVID-19 are minimized by providing prevention, education, identification through examination, surveillance, immunization, treatment and follow-up, isolation, and reporting.

Due to the widespread of COVID-19 in the global community Scott Valley Unified School District has implemented the following infection control measures, including applicable and relevant recommendations from the Centers for Disease Control and Prevention (CDC) and our state and local guidelines.

Introduction

What is COVID-19?

On February 11, 2020, the World Health Organization announced an official name for the disease that is causing the 2019 novel coronavirus outbreak, first identified in Wuhan China. The new name of this disease is Coronavirus disease 2019, abbreviated as COVID-19. In COVID-19, 'CO' stands for 'corona,' 'VI' for 'virus,' and 'D' for disease. Formerly, this disease was referred to as "2019 novel coronavirus" or "2019-nCoV". There are many types of human coronaviruses including some that commonly cause mild upper-respiratory tract illnesses. COVID-19 is a new disease, caused by a new coronavirus that has not previously been seen in humans.

What are the Symptoms of COVID-19?:

Symptoms may appear 2-14 days after exposure to the virus.

COVID-19 Symptoms and Signs:

- Cough
- Shortness of breath or difficulty breathing
- Fever
- Chills
- Repeated shaking with chills
- Fatigue
- Muscle pain
- Headache
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea
- Loss of taste or smell

Procedures to Help Prevent the Spread of COVID-19

Protect Yourself

Older adults and people who have severe underlying medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing serious complications from COVID-19 illness.

How does it spread?

The best way to prevent illness is to avoid being exposed to this virus.

- The virus is thought to spread mainly from person-to-person.
- Between people who are in close contact with one another (within about 6 feet for 15 minutes).
- Through respiratory droplets produced when an infected person coughs, sneezes or talks.
- Through respiratory droplets that can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.

Some recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms.

To prevent the spread of respiratory infections from one person to the next, frequent hand washing is recommended.

Germs can spread from other people or surfaces when:

- Touching eyes, nose, and mouth with unwashed hands
- Preparing or eating food and drinks with unwashed hands
- Touching contaminated surfaces or objects
- Blowing nose, coughing, or sneezing into hands and then touching other people's hands or common objects.
- Touching an item or surface in a public area that may be frequently touched by other people, such as door handles and tables.

Control of COVID-19 Hazards

Avoid Close Contact – Physical Distancing

Physical distancing is an effective method that can help stop or slow the spread of an infectious disease by limiting the contact between people. For COVID-19, the recommended distance is at least 6 feet whenever feasible. To help prevent the spread of respiratory disease, employees should avoid close contact with people who are sick.

Each site will have a plan in place to ensure physical distancing at their location. The plan will include, but is not limited to the following:

- Increasing physical space between employees by modifying the workspace.
- Reducing the number of persons in an area at one time, including visitors.
- Avoiding shared work spaces (desks, offices, and cubicles) and work items (phones, computers, other work tools, and equipment) when possible. If they must be shared, following the cleaning and disinfecting the building and facility guidelines to clean and disinfect shared workspaces and work items before and after use.
- Increasing physical space between employees and public by offering drive-through service or physical barriers such as partitions to the extent possible.
- Using signs, tape marks, or other visual cues on the floor, placed 6 feet apart, to indicate where to stand when physical barriers are not possible wherever needed and as directed by public health.
- Staggered arrival, departure, work, and break times.
- Close or limited access to common areas where employees are likely to congregate and interact.
- Delivering services and holding meetings remotely by phone, video or internet whenever feasible.
- When videoconferencing or teleconferencing is not possible, holding meetings in open, well-ventilated spaces continuing to maintain a distance of at least 6 feet apart and wear face coverings.
- Limiting any unnecessary travel with passenger(s) from one site to another in work vehicles and personal employee vehicles.
- Eliminating all non-essential and non-related services.

Employees will also be asked to practice social distancing outdoors including, but not limited to the following:

- When working in sports fields, playgrounds, assembly areas, and/or other outdoor areas
- Before starting the work shift
- After the work shift
- Coming and going from vehicles
- Entering, working and exiting physical buildings or other structures
- During breaks and lunch periods

Personal Protective Equipment (PPE) used to control employees' exposure to COVID-19

While engineering and administrative controls are considered more effective in minimizing exposure to COVID-19, PPE may also be needed to prevent certain exposures. While correctly using PPE can help prevent some exposures, it should not take the place of other prevention strategies. Examples of PPE include: gloves, goggles, face shields, face masks, and respiratory protection, when appropriate. During an outbreak of an infectious disease, such as COVID-19, recommendations for PPE specific to occupations or job tasks may change depending on geographic location, updated risk assessments for workers, and information on PPE effectiveness in preventing the spread of COVID-19.

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained.

Unless otherwise directed by your supervisor, all employees must cover their mouth and nose with a face cover when around others as determined by California Department of Public Health or Siskiyou County Public Health.

You could spread COVID-19 to others even if you do not feel sick.

Face Coverings

We provide clean, undamaged face coverings in all schools and sites and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department. If an employee, student, parent or other official is concerned about employees not wearing face coverings, he/she is directed to the school/site supervisor.

- Face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance.
- Face coverings for preschool are strongly encouraged but are not required at this time.
- Students grades TK through 12 and all staff must wear a face covering.
- The face covering is meant to protect other people in case you are infected.
- Do NOT use a facemask meant for a healthcare worker.
- Continue to keep about 6 feet between yourself and others. The face covering is not a substitute for social distancing.

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.

Engineering controls

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- Open windows for air circulation to the greatest extent possible.
- All site filters have been changed and are on a replacement cycle. In the event of wildfires, the filters will be changed more frequently.
- Sites with air conditioning systems have built in filters in addition to installation of ionization equipment within the systems.
 - School Sites with sufficient air conditioning/filters: Etna Elementary, Etna Preschool, Scott River High School, Scott Valley Jr. High
- Air scrubbers with UV lights and box fans have been placed in areas/classrooms without air conditioning for increased air flow.
 - School Sites with need for additional filters and air flow: Etna High School (classrooms without air conditioning) and Fort Jones Elementary (entire site, minus the library)

Cleaning and disinfecting

Scott Valley Unified School District established routine schedules to clean and disinfect common surfaces and objects in the workplace. This includes, but is not limited to, classroom technology devices, containers, counters, tables, desks, chairs, benches, door handles, knobs, drinking fountains, refrigerators, vending machines, portable restroom and bathroom surfaces, automobiles and buses – inside and out, and trash cans.

The process of disinfecting includes providing disinfecting products, that are EPA approved for use against the virus that causes COVID-19 and following the manufacturer's instructions for all cleaning and disinfection products (e.g., safety requirements, PPE, concentration, contact time.) Coronaviruses on surfaces and objects naturally die within hours to days. Warmer temperatures and exposure to sunlight will reduce the time the virus survives on surfaces and objects. Normal routine cleaning with soap and water removes germs and dirt from surfaces. It lowers the risk of spreading COVID-19 infection.

Disinfectants kill germs on surfaces after cleaning, that can further lower the risk of spreading infection. Employees will need to follow the district's approved disinfecting products and procedures when using disinfectants. Disinfecting procedures include:

- Ensuring adequate supplies and adequate time for it to be done properly
- Informing the employees and authorized employee representatives of the frequency and scope of cleaning and disinfection
- Some surfaces only need to be cleaned with soap and water. For example, surfaces and objects that are not frequently touched should be cleaned and do not require additional disinfection.
- Clean and disinfect frequently touched surfaces daily and shared workspaces and work items before and after use.
- Store and use disinfectants in a responsible and appropriate manner according to the label.
- Keep all disinfectants out of the reach of children. Disinfectants should typically not be applied on items used by children, especially any items that children might put in their mouths. Many disinfectants are toxic when swallowed.
- Do not overuse or stockpile disinfectants or other supplies.
- Always wear gloves appropriate for the chemicals being used when you are cleaning and disinfecting. Additional personal protective equipment (PPE) may be needed based on setting and product.
- Areas unoccupied for 7 or more days need only routine cleaning.
- Outdoor areas generally require normal routine cleaning and do not require disinfection.

Cleaning and Disinfecting Building or Facility if Someone is Sick:

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

- Close off areas used by the sick person.
- Open outside doors and windows to increase air circulation in the area.
 - Wait 24 hours before you clean or disinfect.
 - If 24 hours is not feasible, wait as long as possible.
- Clean and disinfect all areas used by the sick person, such as offices, bathrooms, common areas, shared electronic equipment like tablets, touch screens, keyboards, remote controls.
- Always wash immediately after removing gloves and after contact with a sick person.
- If more than 7 days since the sick person visited or used the facility, additional cleaning and disinfection is not necessary.
- Continue routine cleaning and disinfection

Washing Facilities

Notify your supervisor if any washing facilities do not have an adequate supply of suitable cleansing agents, water and single-use towels or blowers.

Electronics

For electronics, such as tablets, touch screens, keyboards, and remote controls:

- Consider putting a wipeable cover on electronics.
- Follow manufacturer's instruction for cleaning and disinfecting.
- If no guidance, use alcohol-based wipes or sprays containing at least 70% alcohol. Dry surface thoroughly.

Shared tools, equipment and personal protective equipment (PPE)

PPE must not be shared, e.g., gloves, goggles and face coverings.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses within departments using appropriate sanitizing material for the item and with the sanitizing sprayer where feasible. Training will be provided for proper use of sanitizing sprayer.

Sharing of vehicles will be minimized to the extent feasible, and high-touch points (for example, steering wheel, door handles, seatbelt buckles, armrests, shifter, etc.) will be disinfected between users.

Hand Sanitizing and Hygiene

Hand hygiene procedures include the use of alcohol-based hand rubs and hand washing with soap and water. Washing hands with soap and water is the best way to get rid of germs in most situations, and it's one of the most effective ways to prevent the spread of germs. If soap and water are not readily available, use an alcohol-based hand sanitizer (containing at least 60% alcohol).

Properly wash hands with soap and water by:

- Wet hands first with warm or cold water.
- Apply soap to hands.
- Rub hands vigorously for at least 20 seconds, covering all surfaces of hands and fingers.
- Rinse hands with water and dry thoroughly with paper towel.
- Use paper towel to turn off water faucet.

Alcohol-based hand rub is an ideal method for decontaminating hands, except when hands are visibly soiled (e.g., dirt, blood, body fluids), and may not remove harmful chemicals from hands like pesticides and heavy metals, in which case soap and water should be used. Hand hygiene stations should be strategically placed to ensure easy access.

Using Alcohol-based Hand Rub (follow manufacturer's directions):

- Dispense the recommended volume of product;
- Apply product to the palm of one hand; and
- Rub hands together, covering all surfaces of hands and fingers until they are dry (no rinsing is required), this should take around 20 seconds.

Handwashing facilities will be maintained to provide adequate supply of hand washing soap and paper towels.

Coughing and Sneezing Etiquette

Covering coughs and sneezes and keeping hands clean can help prevent the spread of serious respiratory illnesses.

Germ can be easily spread by:

- Coughing, sneezing, or talking
- Touching your face with unwashed hands after touching contaminated surfaces or objects
- Touching surfaces or objects that may be frequently touched by other people
- Covering coughs and sneezes and washing hands are especially important for infection control measures in healthcare settings, such as emergency departments, doctor's offices, and clinics.

To help stop the spread of germs:

- Cover mouth and nose with a tissue when coughing or sneezing.
- Throw used tissues in the trash
- If a tissue is not available, cough or sneeze into the elbow, not in hands.
- Immediately wash hands with soap and water for at least 20 seconds. If soap and water are not readily available, clean hands with a hand sanitizer that contains at least 60% ethyl alcohol.

Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections** form as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by:

Reporting any concerns to the school office so they can be shared with the Site Principal and addressed.

Employee screening

We screen our employees by:

All employees will perform passive screening by checking for signs and symptoms of COVID-19 each morning before arriving at school/work using the **Appendix E: COVID-19 All Staff Daily Home Screening checklist**.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards considering:

- The severity of the hazard will be assessed and correction time frames assigned, accordingly.
- Individuals are identified as being responsible for timely correction.
- Follow-up measures to be taken to ensure timely correction.

Investigating and Responding to COVID-19 Cases

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be:

- Offered COVID-19 testing at no cost during their working hours.
- The information on benefits described in Training and Instruction, and Exclusion of COVID-19 Cases, below, will be provided to them.

System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms and possible hazards to, and how [Describe how this will be accomplished in your workplace].
- That employees can report symptoms and hazards without fear of reprisal.
- Our procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.
- Where testing is not required, how employees can access COVID-19 testing [determine what options are available for employees to obtain voluntary testing, be it employer provided, available through health plans or local testing centers. The purpose is to give employees the tools to get tested when they have symptoms to reduce the likelihood of bringing the virus to work. This type of voluntary testing does not have to be provided by the employer].
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test. [If you are required to provide testing because of an employee exposure, have a plan for how this will be accomplished at no cost to the employee during working hours, including when the testing is in response to CCR Title 8 section 3205.1, Multiple COVID-19 Infections and COVID-19 Outbreaks, as well as section 3205.2, Major COVID-19 Outbreaks. It is recommended that the plan be developed in advance for large or high-risk workplaces.]
- Information about COVID-19 hazards employees (including other employees and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.
- [Describe other aspects of your system of COVID-19 related communication being implemented in your workplace].

Employee Training and Instruction

Scott Valley Unified School District will provide effective training and instruction that includes:

- What is COVID-19 and how is it spread
- COVID-19 signs and symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms
- When to seek medical attention if not feeling well
- Prevention of the spread of COVID-19 if you are sick

- Reminders and methods to avoid touching eyes, nose and mouth
- Coughing and sneezing etiquette
- Safely using cleansers and disinfectants
- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.

Appendix D: COVID-19 Training Roster will be used to document this training.

Exclusion of COVID-19 Cases- If an Employee is Sick

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is work related.
- Providing employees at the time of exclusion with information on available benefits including employer-provided employee sick leave benefits, payments from public sources or other means of maintaining earnings, rights and benefits, where permitted by law and when not covered by workers' compensation.

Employees will be asked to monitor their health each day, and are asked to notify their supervisor before their scheduled shift and prior to arriving at the site, if they have been exposed to someone with COVID-19 or you have a temperature of 100.4 or more, tiredness, chills, shortness of breath, difficulty breathing, nausea, vomiting, diarrhea, sore throat, loss of taste or smell, cough, or muscle pain.

If an employee is not feeling well and is exhibiting symptoms that may be attributed to COVID-19, such as acute respiratory symptoms or a fever, Scott Valley Unified School District will:

- Immediately send employees with acute respiratory illness symptoms home or to medical care as soon as possible
- Actively encourage sick employees to stay home.
- If an employee goes home because they are sick, follow the cleaning and disinfecting the building and facility guidelines to disinfect the area/room/office where the person worked, the tools and equipment they used prior to use by others.

- Employees who are well but who have a sick family member at home with COVID-19 should notify their supervisor and follow CDC-recommended precautions.

Compliance

- This addendum will be reviewed regularly and according to federal, state and local requirements. These guidelines and written addendum are subject to change as information is received and the situation evolves.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

Return-to-Work Criteria

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred (note: this may be different based on local county public health guidelines):
 - At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
 - COVID-19 symptoms have improved.
 - At least 10 days have passed since COVID-19 symptoms first appeared.
 - COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
 - A negative COVID-19 test will not be required for an employee to return to work.
 - If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.
-

Prepared by:

Micheline G Miglis, Superintendent

DATE: January 25, 2021

Appendix A: Identification of COVID-19 Hazards

All persons, regardless of symptoms or negative COVID-19 test results, will be considered potentially infectious. Particular attention will be paid to areas where people may congregate or come in contact with one another, regardless of whether employees are performing an assigned work task or not. For example: meetings, entrances, bathrooms, hallways, aisles, walkways, elevators, break or eating areas, cool-down areas, and waiting areas.

Evaluation of potential workplace exposure will be to all persons at the workplace or who may enter the workplace, including coworkers, employees of other entities, members of the public, customers or clients, and independent contractors. We will consider how employees and other persons enter, leave, and travel through the workplace, in addition to addressing fixed work locations.

Person conducting the evaluation: _____

Date: _____

Name(s) of employee and authorized employee representative that participated: List name(s)

Interaction, area, activity, work task, process, equipment and material that potentially exposes employees to COVID-19 hazards	Places and times	Potential for COVID-19 exposures and employees affected, including members of the public and employees of other employers	Existing and/or additional COVID-19 prevention controls, including barriers, partitions and ventilation

Appendix B: COVID-19 Inspections

Date: _____

Name of person conducting the inspection: _____

Work location evaluated: _____

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
Engineering			
Barriers/partitions			
Ventilation (amount of fresh air and filtration maximized)			
Additional room air filtration			
Administrative			
Physical distancing			
Surface cleaning and disinfection (frequently enough and adequate supplies)			
Hand washing facilities (adequate numbers and supplies)			
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions			
PPE (not shared, available and being worn)			
Face coverings (cleaned sufficiently often)			
Gloves			
Face shields/goggles			
Respiratory protection			

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

Date: _____

Name of person conducting the investigation: _____

Employee (or non-employee*) name:		Occupation (if non-employee, why they were in the workplace):	
Location where employee worked (or non-employee was present in the workplace):		Date investigation was initiated:	
Was COVID-19 test offered?		Name(s) of staff involved in the investigation:	
Date and time the COVID-19 case was last present in the workplace:		Date of the positive or negative test and/or diagnosis:	
Date the case first had one or more COVID-19 symptoms:		Information received regarding COVID-19 test results and onset of symptoms (attach documentation):	

Results of the evaluation of the COVID-19 case and all locations at the workplace that may have been visited by the COVID-19 case during the high-risk exposure period, and who may have been exposed (attach additional information):

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:			
All employees who may have had COVID-19 exposure and their authorized representatives.	Date:		
	Names of employees that were notified:		
Independent contractors and other employers present at the workplace during the high-risk exposure period.	Date:		
	Names of individuals that were notified:		
What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?	What could be done to reduce exposure to COVID-19?		
Was local health department notified?			Date:

*Should an employer be made aware of a non-employee infection source COVID-19 status.

Appendix D: COVID-19 Training Roster

Date: _____

Person that conducted the training: _____

Employee Name	Signature

COVID-19

All Staff Daily Home Screening

All staff: Check for signs and symptoms each morning before you arrive for school/work.

Section 1: Symptoms

These symptoms indicate a possible illness that may put you at risk for spreading illness to others. Please check for these symptoms:

<input type="checkbox"/>	Temperature 100.4 degrees Fahrenheit or higher
<input type="checkbox"/>	Sore throat
<input type="checkbox"/>	New uncontrolled cough that causes difficulty breathing
<input type="checkbox"/>	Diarrhea, vomiting, or abdominal pain
<input type="checkbox"/>	New onset of severe headache, especially with fever

Section 2: Close Contact/Potential Exposure

<input type="checkbox"/>	<i>Had close contact (within 6 feet of an infected person for at least 15 minutes) with a person confirmed COVID-19</i>
--------------------------	---

Any student or school staff member with a temperature of 100.4 °F or greater, regardless of other symptoms will be excluded from the school site until they either present proof of a negative COVID 19 test, or 10 days have passed since the fever or other symptoms began, and at least 3 days have passed without a fever (without the use of fever reducing medications) and respiratory symptoms (coughing, shortness of breath) have resolved. Notify your supervisor and stay home.

COVID-19 School Guidance Checklist

January 14, 2021

CALIFORNIA
ALL

Your Actions
Save Lives

Date: _____

2021 COVID-19 School Guidance Checklist

Name of Local Educational Agency or Equivalent: Scott Valley Unified

Number of schools: 5

Enrollment: 675

Superintendent (or equivalent) Name: Micheline G Miglis

Address: 11918 Main Street

Phone Number: 530.468.2727

Fort Jones, CA 96032

Email: mmiglis@svusd.us

Date of proposed reopening:

County: Siskiyou

Current Tier: Purple

(please indicate Purple, Red, Orange or Yellow)

Type of LEA: District

Grade Level (check all that apply)

TK 2nd 5th 8th 11th

K 3rd 6th 9th 12th

1st 4th 7th 10th

This form and any applicable attachments should be posted publicly on the website of the local educational agency (or equivalent) prior to reopening or if an LEA or equivalent has already opened for in-person instruction. For those in the Purple Tier, materials must additionally be submitted to your local health officer (LHO), local County Office of Education, and the State School Safety Team prior to reopening.

The email address for submission to the State School Safety for All Team for LEAs in Purple Tier is:

K12csp@cdph.ca.gov

LEAs or equivalent in Counties with a case rate $\geq 25/100,000$ individuals can submit materials but cannot re-open a school until the county is below 25 cases per 100,000 (adjusted rate) for 5 consecutive days.

For Local Educational Agencies (LEAs or equivalent) in ALL TIERS:

I, Micheline G Miglis, post to the website of the local educational agency (or equivalent) the COVID Safety Plan, which consists of two elements: the **COVID-19 Prevention Program (CPP)**, pursuant to CalOSHA requirements, and this **CDPH COVID-19 Guidance Checklist** and accompanying documents,

which satisfies requirements for the safe reopening of schools per CDPH [Guidance on Schools](#). For those seeking to open while in the Purple Tier, these plans have also been submitted to the local health officer (LHO) and the State School Safety Team.

I confirm that reopening plan(s) address the following, consistent with guidance from the California Department of Public Health and the local health department:

Stable group structures (where applicable): How students and staff will be kept in stable groups with fixed membership that stay together for all activities (e.g., instruction, lunch, recess) and minimize/avoid contact with other groups or individuals who are not part of the stable group.

Please provide specific information regarding:

How many students and staff will be in each planned stable, group structure? (If planning more than one type of group, what is the minimum and maximum number of students and staff in the groups?)

We opened in August 2020 when we were not in Purple Tier. For TK-5, fif

If you have departmentalized classes, how will you organize staff and students in stable groups?

We have block schedules in 2020-2021. Students attend 3 ninety minute

If you have electives, how will you prevent or minimize in-person contact for members of different stable groups?

We have block schedules in 2020-2021. Students attend 3 ninety minute

Entrance, Egress, and Movement Within the School: How movement of students, staff, and parents will be managed to avoid close contact and/or mixing of cohorts.

Face Coverings and Other Essential Protective Gear: How CDPH's face covering requirements will be satisfied and enforced for staff and students.

Health Screenings for Students and Staff: How students and staff will be screened for symptoms of COVID-19 and how ill students or staff will be separated from others and sent home immediately.

Healthy Hygiene Practices: The availability of handwashing stations and hand sanitizer, and how their safe and appropriate use will be promoted and incorporated into routines for staff and students.

Identification and Tracing of Contacts: Actions that staff will take when there is a confirmed case. Confirm that the school(s) have designated staff persons to support contact tracing, such as creation and submission of lists of exposed students and staff to the local health department and notification of exposed persons. Each school must designate a person for the local health department to contact about COVID-19.

Physical Distancing: How space and routines will be arranged to allow for physical distancing of students and staff.

Please provide the planned maximum and minimum distance between students in classrooms.

Maximum: 6 feet

Minimum: 4 feet. If this is less than 6 feet, please explain why it is not possible to maintain a minimum of at least 6 feet.

We returned in-person in August 2020 when we were not in Purple Tier. O

Staff Training and Family Education: How staff will be trained and families will be educated on the application and enforcement of the plan.

Testing of Staff: How school officials will ensure that students and staff who have symptoms of COVID-19 or have been exposed to someone with COVID-19 will be rapidly tested and what instructions they will be given while waiting for test results. Below, please describe any planned periodic asymptomatic staff testing cadence.

Staff asymptomatic testing cadence. Please note if testing cadence will differ by tier:

Testing of Students: How school officials will ensure that students who have symptoms of COVID-19 or have been exposed to someone with COVID-19 will be rapidly tested and what instructions they will be given while waiting for test results. Below, please describe any planned periodic asymptomatic student testing cadence.

Planned student testing cadence. Please note if testing cadence will differ by tier:

Identification and Reporting of Cases: At all times, reporting of confirmed positive and suspected cases in students, staff and employees will be consistent with [Reporting Requirements](#).

Communication Plans: How the superintendent will communicate with students, staff, and parents about cases and exposures at the school, consistent with privacy requirements such as FERPA and HIPAA.

Consultation: (For schools not previously open) Please confirm consultation with the following groups

Labor Organization

Name of Organization(s) and Date(s) Consulted:

Name: SVTA

Date: _____

Parent and Community Organizations

Name of Organization(s) and Date(s) Consulted:

Name: Reopening Task Force

Date: _____

If no labor organization represents staff at the school, please describe the process for consultation with school staff:

For Local Educational Agencies (LEAs or equivalent) in PURPLE:

Local Health Officer Approval: The Local Health Officer, for (state County) Siskiyou. County has certified and approved the CRP on this date: 08/20/2020. If more than 7 business days have passed since the submission without input from the LHO, the CRP shall be deemed approved.
